Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-13 and 26 drawn to recombinant transferrins, and a culture supplement classified in least Class 435, subclass 240.31.
- II. Claims 14-25 drawn to recombinant constructs containing transferrin encoding DNA and its expression in transformed cells, classified in at least Class 435, subclass 69.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the protein as claimed can be made by chemical synthesis such as the Merrifield procedure or can be purified from natural sources..

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and the search for either Group is not co-extensive, restriction for examination purposes as indicated is proper.

Art Unit: 1653

Applicant is advised that in order for the response to this requirement to be complete, it must include an election of the invention to be examined even though the requirement be traversed.(37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
